NOAA NEW EDITION CHARTS, AVAILABILITY, AND MARINER RESPONSIBILITY

- NOAA recognizes two products as official NOAA paper nautical charts. They are: 1) The Charts-on-Demand chart printed and distributed by OceanGrafix using print-on-demand technology. www.OceanGrafix.com, and 2). The traditional paper chart printed by NOAA and distributed by the Federal Aviation Administration (FAA). NOAA Dates of Latest Edition provides notification of chart availability for both products through a listing at <http://chartmaker.ncd.noaa.gov/mcd/dole.htm>. When NOAA releases a new edition nautical chart, OceanGrafix has the ability to distribute the Charts on Demand chart immediately. The corresponding traditional paper chart is available for distribution six to eight weeks later. Immediately upon release both versions are officially recognized to meet Federal chart carriage requirements. The mariner is responsible for keeping their charts current through application of Notice to Mariner corrections. The last Notice applied by NOAA prior to the traditional paper chart release for printing is listed at the chart lower left corner as "Corrected through NM" and "Corrected through LNM". Additionally, the last Notice to Mariners applied by NOAA to the Charts-on-Demand version of the chart is listed at the chart lower left under "Additional Corrections Through: NIMA Notice / Local Notice". Note: the Edition Date is the month and year in which the chart is printed. It is not the date of the last Notice to Mariners applied by NOAA. <http://chartmaker.ncd.noaa.gov/mcd/dole.htm>. For questions contact NOAA at help@nauticalcharts.gov.

Nihoa (23°05'N., 161°55'W.).

The **Northwestern Hawaiian Islands Coral Reef Ecosystem Reserve**, established by Executive Order 13178 of December 4, 2000, encompasses an area of the marine waters and submerged lands of the Northwestern Hawaiian Islands. The seaward boundary of the reserve is 50 miles from the approximate geographical center of Nihoa Island, Necker Island, French Frigate Shoals, Gardner Pinnacles, Maro Reef, Laysan Island, Lisianski Island, Pearl and Hermes Reef, Midway Atoll, and Kure Atoll and includes all areas of the Hawaiian Islands National Wildlife Refuge and Midway Atoll National Wildlife Refuge. As part of the establishment of the reserve, Executive Order 13178 contains conservation measures that restrict some activities throughout the reserve, and establishes Reserve Preservation Areas around certain islands, atolls, and banks. With certain exceptions, all consumptive uses are restricted within the Reserve Preservation Areas. For additional information, go to <http://hawaiiireef.noaa.gov>.
